SunGard Launches New Clearing Gateways for Derivatives

Paris, 28th May 2009 - [SunGard](#) is launching a series of new clearing gateways for listed derivatives markets. These smart gateways will be integrated with SunGard's post-trade derivatives processing solutions, including, [GL Clearvision](#), [GL Ubix](#) and [GMI](#), helping SunGard customers to improve performance and efficiency.

Developed in Java and based on industry standards such as FIX messaging, SunGard's smart gateways can be rolled out in a number of different technical environments including Windows, UNIX and Linux. This new architecture is scalable so that multiple gateways can be installed for a single exchange to help support increased trading volumes. The smart gateways will be launched throughout 2009, replacing SunGard's existing clearing gateways by early 2010.

GL Clearvision, SunGard's solution for matching and clearing, has been integrated with the first smart gateway, NYSE-Liffe US (cleared by the OCC). Four SunGard customers are already using the NYSE-Liffe US smart gateway.

Vincent Burzynski, chief product officer for SunGard's global trading business, said, "SunGard customers in the post-trade derivatives environment continue to face challenges in terms of scalability, performance and efficiency. We are confident that our investment in a new technical architecture, based on industry standard frameworks, will help support our customers' future business growth."

About SunGard Global Trading

SunGard provides multi-asset, front- to back-office trading solutions for equities, fixed income, derivatives, FX and commodities on exchanges worldwide. These solutions support full lifecycle trading and trade processing activities including information services, market connectivity and order management that help improve trade efficiency and risk monitoring.

About SunGard

SunGard is one of the world's leading software and IT services companies. SunGard serves more than 25,000 customers in more than 70 countries, including the world's 25 largest financial services companies.

SunGard provides software and processing solutions for financial services, higher education and the public sector. SunGard also provides disaster recovery services, managed IT services, information availability consulting services and business continuity management software.

With annual revenue exceeding \$5 billion, SunGard is ranked 435 on the Fortune 500 and is the largest privately held business software and services company on the Forbes list of private businesses. Based on information compiled by Datamonitor*, SunGard is the third largest provider of business applications software after Oracle and SAP. Continuity, Insurance & Risk has recognized SunGard as service provider of the year an unprecedented five times. For more information, please visit SunGard at www.sungard.com.
