SunGard Integrates Algorithmic Trading Solutions with QuantHouse Market Data Feeds

London, March 1st, 2010 – SunGard has integrated its smart order routing and algorithmic trading solutions, [GL Stream](#) and [GL Tactics](#), with market data feeds from QuantHouse, a leading provider of ultra low latency market data technologies. SunGard customers using the solutions will be able to select data feeds from either SunGard or QuantHouse, according to speed, content, resiliency and stability, helping them to choose the right feed for a specific time and goal. The integration is part of SunGard's multiple market data vendor strategy, designed to help improve the support for customers in algorithmic trading, high frequency trading or multi-venue environments.

Pierre Feligioni, general manager and co-founder of QuantHouse, said, "The need for fast market data flows has become paramount with the development of algorithmic trading and high frequency trading. Brokers are searching for solutions to improve their market data capture and order routing performance. SunGard's trading customers will be able to benefit from QuantHouse market data co-location offering to help improve market data capture and SunGard's smart order routing capacity."

Yassine Brahim, president of SunGard's global trading business, said, "Algorithmic trading systems need to process a lot of market data, both in throughput and real-time, to support brokers' execution strategies. The resiliency of the market data delivery is important to help brokers deploy algorithms. With its algorithmic trading solutions now available on both GL Net and QuantHouse market data feeds, SunGard is helping its customers increase the sourcing, performance and resiliency of their market data feeds."

About QuantHouse

QuantHouse is an independent global provider of end-to-end systematic trading solutions.

It includes ultra low latency market data technologies, algo-trading development framework, trading infrastructure and order routing service; to help hedge funds, proprietary desks and low latency sensitive sell side firms to take the lead.

QuantHouse products and services offering are composed of:

- **QuantFEED**, Ultra Low Latency Market Data technologies ... to be the first to detect market opportunities,

SUNGARD[®]

- **QuantFACTORY**, the Algo Trading Strategy Development framework ... to be the first to launch new trading models,
- **QuantLINK**, global trading infrastructures ...to be the first to match opportunities.
